

What We Do

We are Independent Investors who work exclusively in the Global Markets. We are NOT employed by any Banks' of Canada or any other Financial Institutions. However, we use and connect with Financial Institution Networks within Canada in order to access the Global Market Exchange for Canada and the United States. In addition, we have the capacity to work with GBP International Markets for those investors who wish to allocate resources to the opportunities these markets provide.

About Us

Global Market Source International emerged in the first quarter of 2007. In December of 2013 Global Market Source International became a registered Canadian Corporation.

Working with Global Market Source International means simplifying your investments. We put you in control of your finances. We believe you should have the knowledge to understand your finances and the power to execute informed financial decisions.

Our Goals

Global Market Source International encourages clients to actively participate in the investment process in order to learn how to become independent investors. Our goal is to assist our clients to be mindful money managers, fully equipped to make informed financial decisions.

Investment Strategies

1. Identifying and prioritizing your goals; these may include entrepreneurial ventures, education, a home purchase or retirement preparation.
2. When specifying your time horizon, each goal normally has a specific timeline for when money is required. Conservative investments compliment short time horizons, while equities are more appropriate for longer term goals of more than 10 years.
3. Establishing your risk tolerance and defining your comfort level with risk will help to determine the mix of cash, fixed income and equity that is right for your portfolio.
4. Understanding the investments in your portfolio and knowing what you currently own enables you to decide whether you need to make adjustments to achieve your long-term goals.
5. Determining where to invest next; once you've built a strong foundation for your portfolio. By signing up with us, you will understand how trends and market events can shape your investment decisions.

Tax Free Savings Account – How it Works?

Tax Free Savings Accounts (TFSA's) were first introduced in 2009. From 2009 through 2012 the contribution limit was \$5,000 per person, per year. In 2013 and 2014 the limit was raised to \$5,500. In January 2015 it was increased to \$10,000.

Effective January 2016 the Liberal Government plans to revise the TFSA maximum contribution limit back to \$5,500 per year.

Global Market Source International encourages everyone to continually contribute to a Tax Free Savings Account instead of an ordinary (Bank) Savings Account because of the following tax benefits:

1. Investment income earned in a TFSA is **tax free**,
2. Withdrawals from a TFSA are **tax free**,
3. Unused TFSA contribution room is carried forward and accumulates in future years.

RESP – Registered Education Savings Plan

One of the best ways to save for a child's postsecondary education is through a Registered Education Savings Plan (RESP). Whether you want to save for your own children, your grandchildren, a niece, nephew, or family friend, an RESP offers flexibility tax deferred investment growth and direct government assistance to help you save for a child's education.
